-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because of the following discrepancy.

In the last line, delete "(Figure 1)".

Correction is required. See MPEP § 608.01(b).

2. The disclosure is objected to because of the following informalities:
 - Page 1, lines 5 and 6, delete "according to the definition of the species in Claims 1 and 2".
 - Page 1, line 25, delete, "having the features of claim 1".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. **Claims 1-5** are rejected under 35 U.S.C. 102(b) as being anticipated by Zeiler et al. 6,301,790.

Zeiler discloses a circular power saw (10), composed of a saw assembly with a housing (14) that encloses a motor and a saw blade (22), whereby the saw assembly is pivotably supported relative to a footplate (30) such that it can be adjusted between a

Art Unit: 3723

minimum and maximum cutting depth, wherein the saw assembly is capable of being substantially decoupled from handling forces which act on the saw blade, in particularly from the handle (66) during sawing; the saw assembly is capable of being coupled via a force-dependent coupling (at 70) with cutting-depth adjusting means (46) so that, if kickback occurs, the cutting-depth adjusting means are automatically detachable, so that the saw assembly can then move out of the way in a manner that minimizes the cutting depth; it is capable of being handled and guided using only the handle, which is connected to the swivel arm (72) in a fixed manner; the saw assembly is supported on the swivel arm such that the cutting depth is adjustable independently of the handle; and wherein each, in particular, cutting depth position of the saw assembly is releasably lockable in position using an overload coupling (at 46).

Allowable Subject Matter

5. Claims 6-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J. Grant whose telephone number is (571) 272-4484. The examiner can normally be reached on Mon-Fri 8:00-4:30.
